

Mission First!!!

SOFIC said, "Carry On."

If we cannot follow the plan, then the plan is broken not the mission.

And amid a worldwide Pandemic, a Virtual Tradeshow was developed and deployed on time and impressive to all!

The Industry banded together and presented a stunning 21st century Virtual Tradeshow, in which Janteq was proud to participate. Gathering the focus of organizations that span the globe, vSOFIC became an example of how to accomplish, no matter the challenge.

With Presentations, Seminars, Panels, Q & A Sessions, there was little that could not be achieved; and all of this was done in the virtual world. Janteq was able to be a part of an exciting venture, showing our product and our systems to the vSOFIC Community.

A screenshot of the Janteq website interface. The top section features a dark background with a circular graphic on the left containing the Janteq logo. To the right, the text reads 'Remote Video Surveillance and Intelligence Solutions' and 'Janteq.com'. Below this is a navigation menu with buttons for 'Overview', 'Resources', 'Contacts', 'Live Chat', 'Virtual Showcase', 'Manage', and 'Reports'. At the bottom, there is a paragraph of text: 'JANTEQ designs and delivers innovative wireless products that meet our customers' unique mission critical needs in both the federal and commercial sectors. We manufacture, license, and design high-definition, digital wireless video transmitters and receivers and produce innovative products for government applications. From wearable technology to ground and air communication solutions, JANTEQ can facilitate the most secure video communication missions!'

Our Visitors were able to see right into our facility and have real time conversations with our team.
